

ACCESS ENTERPRISE

Tool Journey Map helps the entrepreneur to know which are the next steps he/she needs to take to try again, having learning from his/her mistakes. It creates a positive mind set and a forward-thinking approach.

The entrepreneur has to write the steps he/she needs to take to recover from failure and to start a new business plan, such as checking his/her finance, listing the contacts he/she needs to talk to, etc. The Business Advisors can guide the entrepreneur through this activity.
